

Bob is a member of our St. Luke Family. If it is possible for you to become a living liver donor or to at least pass this along to friends and other family members-let's try to help Bob!

Give Bob the Gift of Life. Become his Living Liver Donor today.

- Robert "Bob" Sexton is a 41 year old father of five who lives in Toms River, NJ.
- He works for Legend Biotech, an organization dedicated to finding a cure for cancer, as Director of Commercial CAR-T Operations.
- In July of 2020, Bob was diagnosed with a rare and aggressive form of cancer of the bile duct. His liver can no longer function properly.

To get right to the point, Bob needs a liver transplant. Bob needs to find a "Living Liver Donor" to survive and be cancer free.

Please reach out to Stephanie Sexton at **732-312-8888** if you are interested in learning more. You may also privately contact Linda Wood, the UPenn Living Liver Donor Coordinator, directly at **215-349-8220**.

If you are ready to complete the initial Living Liver Donor questionnaire, please scan this code or visit the website.

Register to be a living donor at:

If you can personally help, please do. If you are unable, Bob also needs advocates. Share his story with others who may be interested in learning about becoming a "Living Liver Donor". Please consider all the people you know, as many as 50% of people voluntarily register to be organ donors!
